WHY SPIRE DATA

**Technology Consulting** - Modernize Data Management, Data Strategy and Governance, and Analytics Life cycle

**Professional Services** - End-to-End implementation or agile plug & play services. We offer bespoke stack of services or customized offerings based on the business's existing IT infrastructure

**Balancing build vs buy** - Technical & skill assessment to balance building a solution or buy pre-build solutions form our elite technology partners

**Business Analytics** - We cover horizontal and vertical industry or function analytics. We consult businesses on use cases for AI & advanced analytics or even build tailored AI/ML models on open source or self-service analytics applications
